

Suggestions

- On using the SWG to help fill in the details on each options: Ask specific questions rather than making a blanket request.

Follow up: Staff will develop a master worksheet

- On the cost information from AZ/NM: Contact the states and find out what is behind the numbers (how the numbers were arrived at; what factors were considered.) This information could then be used to figure out the Utah market.
- Use sector work groups. Other stakeholder could be brought into the process that way. (One face many voices concept) That approach will also make it easier for industry to help provide information.

Follow-up: See sector list and accompanying assignments.

- The cost per ton of CO2 reduced is the hardest for students to find. SWG members were asked to provide that information for each option if they had access to it.
- Have the sector groups consolidate the lists – grouping things that made sense and flagging redundancies.
- Sector group staff leads will take responsibility to send notices of the meetings to those interested in participating. Conference calls will be used when possible.

Follow-up: Information on sector meetings will be posted on the web. Sector group lead to provide information to DEQ for posting. Also, if a conference call is desired, let staff contact know a call-in number can be arranged.

- Consider paring down list to a specific number and forward to the BRAC the “best of the best.” Set a target for how many items ought to be in Bin A
